Typing speed of 55 words per minute

EMPLOYMENT

Lettuce Entertain You Enterprises

Full Stack Web Developer

Chicago, IL 9/18/2017 - Present

Designing and developing custom Wordpress themes for restaurants and venue spaces. I build bespoke websites that are meticulously tailored to the client's needs. I have maintained and added new features to complex custom plugins. I am involved in every aspect of the process: Initial interview, creating and sending the proposal, collaborating with graphic designers on art direction, creating wireframes and mockups in Illustrator, developing the site, QA, and launch via Amazon Web Services.

I oversee 60+ custom brand sites on a day to day basis. I am in daily communication with various marketing managers regarding adding new features to their sites, bug fixes, and ways to optimize site performance and SEO.

I am leading a Google Analytics(GA) overhaul for current sites. I'm creating standards of tagging practice for current and future websites. I am creating custom tagging plans, implementing goals, dashboards, adding custom GA events with Javascript, and educating marketing managers how to best use the GA ecosystem.

Freelance Web Developer and Designer

Chicago, IL 8/20/2016-Present

Creating custom Wordpress themes for clients. I designed and developed custom websites based on client needs. I provided website maintenance post launch.
